## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's arguments filed 2 September 2005 regarding the rejection of claims 7-12, 17-20 under 35 USC 101 have been fully considered but they are not persuasive.

Applicant amended claim 7 by adding "data structures" to the preamble of the claim. However, the body of the claim merely recites non-functional descriptive material which does not actually represent a data structure. Claim 17 was merely amended to add "computer-implemented" in the preamble. However, the claimed method does not seem to produce any useful, concrete and tangible result. Therefore, claims 7-12, 17-20 lack usefulness under the practical application requirement of 35 U.S.C. 101.

For all the reasons discussed above, rejection to claims 7-12, 17-20 under 35 U.S.C. 101 is maintained.

Applicant has not submitted a terminal disclaimer. Therefore, the rejection of claims 1-20 under the judicially created doctrine of double patenting over claims 1-15 of U. S. Patent No. 6,778,993 is maintained.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 7-12, 17-20 are rejected under 35 U.S.C. 101 because they do not meet the utility requirement of 35 U.S.C. 101.

In the present application,

- The body of claims 7-12 recites mere non-functional descriptive material which does not meet the requirement of a data structure recited in the preamble
- Claims 17-20 now recite "computer-implemented" in the preamble. However, the claimed method does not seem to produce any useful, concrete and tangible result. Therefore, claims 7-12, 17-20 lack usefulness under the practical application requirement of 35 U.S.C. 101.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-20 are rejected under the judicially created doctrine of double patenting over claims 1-15 of U. S. Patent No. 6,778,993 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: an attribute value table is used to store attribute

values for a plurality of data items independent of the category to which each data item belong.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
